

AI LEAD GENERATION & SALES RESEARCH

6-MONTH PROFESSIONAL PROGRAM

Find the right prospects. Research intelligently. Build qualified lead systems.

VEYORA ACADEMY

PROGRAM AT A GLANCE

A practical six-month program for learning how to research prospects, build qualified lead databases, use AI for sales research and design repeatable lead-generation workflows.

DURATION	6 Months / 24 Weeks
LEVEL	Beginner → Advanced
FORMAT	Practical + Project-Based
CORE FOCUS	Lead Generation & Sales Research
DATA FOCUS	Prospect Research + Qualification
FINAL OUTPUT	AI-Powered Lead Generation System

WHAT YOU WILL LEARN

- Lead generation, prospecting and sales research fundamentals.
- Ideal Customer Profile (ICP) and target-market research.
- Company and decision-maker research using appropriate sources.
- Clean lead databases in Google Sheets and Excel.
- Lead qualification, scoring and CRM pipeline concepts.
- AI-assisted research, enrichment, classification and personalization.
- n8n / Make concepts for lead-generation workflows.
- Professional lead reports, portfolio work and client delivery.

YOUR LEAD GENERATION JOURNEY

The program moves from research fundamentals to ICP design, prospecting, qualification, AI, CRM, automation and professional delivery.

01	Lead Generation Foundations Weeks 1–4 Sales research, ICP, target markets, research methods and data quality.
02	Prospecting & Web Research Weeks 5–8 Company research, decision-makers, web research and lead databases.
03	Qualification, CRM & Sales Research Weeks 9–12 Lead scoring, CRM concepts, pipeline stages and reporting.
04	AI-Powered Lead Research Weeks 13–16 AI research, enrichment, classification and personalization.
05	Automation & Lead Operations Weeks 17–20 n8n / Make, CRM routing, enrichment and reporting workflows.
06	Portfolio, Services & Capstone Weeks 21–24 Client delivery, services, portfolio and final system.

24-WEEK PROFESSIONAL CURRICULUM

Every week combines sales-research concepts with practical output. The goal is qualified, documented lead systems—not large lists of unverified contacts.

WEEK 1	Lead Generation Fundamentals
Topics What a lead is; prospecting vs sales research; B2B/B2C; lead lifecycle	Practical Work Map a lead journey. Output Lead Generation Map
WEEK 2	Ideal Customer Profile (ICP)
Topics Company profile; industry; size; location; pain points; decision-maker roles	Practical Work Create an ICP. Output ICP Document
WEEK 3	Target Market Research
Topics Segments; industry research; competitor research; search strategy	Practical Work Research target segments. Output Market Research Brief
WEEK 4	Research & Data Quality
Topics Data fields; accuracy; consistency; duplicate prevention	Practical Work Create lead template and quality checklist. Output Lead Database Template

WEEK 5	Company Research
Topics Target companies; websites; business information; technology/service clues	Practical Work Research target companies. Output Company Research List
WEEK 6	Decision-Maker Research
Topics Relevant roles; professional profiles; contact relevance	Practical Work Identify decision-maker roles. Output Decision-Maker Research
WEEK 7	Web Research Techniques
Topics Search operators; public business information; cross-checking	Practical Work Build a repeatable research process. Output Research SOP
WEEK 8	Lead Database Project
Topics Company data; contact data; ICP fit; source tracking; cleaning	Practical Work Build a structured sample database. Output Lead Database Project

WEEK 9	Lead Qualification
Topics Qualification criteria; fit vs intent; positive/negative signals	Practical Work Create qualification framework. Output Qualification Framework
WEEK 10	Lead Scoring
Topics Scoring criteria; weighted factors; priority levels	Practical Work Build a simple scoring model. Output Lead Scoring Sheet
WEEK 11	CRM & Pipeline Basics
Topics CRM purpose; contacts; pipeline; stages	Practical Work Design a sales pipeline. Output CRM Pipeline Map
WEEK 12	Sales Research Reporting
Topics Research summaries; lead lists; insights; client reporting	Practical Work Create a research report. Output Sales Research Report

WEEK 13	AI for Lead Research
Topics Prompt design; research assistance; summaries; structured outputs	Practical Work Create reusable AI prompts. Output AI Research Prompt Library
WEEK 14	AI Lead Enrichment
Topics Classification; industry/role tagging; structured enrichment	Practical Work Organize sample data with AI. Output AI Enrichment Dataset
WEEK 15	AI Lead Qualification
Topics Qualification prompts; fit analysis; reason codes; human review	Practical Work Create AI-assisted qualification workflow. Output AI Qualification Workflow
WEEK 16	Personalized Sales Research
Topics Company insights; pain-point research; personalization; quality control	Practical Work Create research-backed personalization briefs. Output Prospect Personalization Brief

WEEK 17	Automation Fundamentals
Topics Triggers; actions; conditions; data flow	Practical Work Map repetitive lead task to automation. Output Automation Blueprint
WEEK 18	n8n / Make Lead Workflow
Topics Forms; Sheets; webhooks; notifications; workflow logic	Practical Work Build/design form → database → notification workflow. Output Lead Automation
WEEK 19	Lead Routing & CRM Automation
Topics Assignment; qualification routing; CRM updates; follow-ups	Practical Work Design lead-routing workflow. Output Lead Routing System
WEEK 20	AI + Lead Automation
Topics AI classification; enrichment; scoring; human approval; errors	Practical Work Create AI-assisted lead operations workflow. Output AI Lead Operations System

WEEK 21	Lead Generation Campaign Planning
Topics Campaign objective; target segment; criteria; quality metrics	Practical Work Create campaign plan. Output Campaign Plan
WEEK 22	Freelance Lead Generation Services
Topics Service packages; requirements; deliverables; portfolio evidence	Practical Work Create service offer. Output Lead Generation Service Package
WEEK 23	Portfolio & Client Delivery
Topics Methodology; database presentation; reporting; QA; handoff	Practical Work Create case study and delivery pack. Output Portfolio Case Study
WEEK 24	Final Capstone
Topics ICP; research; prospecting; qualification; AI; CRM; automation; reporting	Practical Work Build and present complete system. Output Final Capstone

TOOLS & PROFESSIONAL STACK

AREA	TOOLS / SKILLS
Research	Search engines, company websites, public business information, research checklists
Data	Google Sheets, Excel, cleaning, validation, deduplication
CRM	Contacts, companies, pipeline, lead stages, segmentation
AI	ChatGPT and AI-assisted research, classification, enrichment, summarization
Automation	n8n, Make, triggers, conditions, webhooks
Sales Research	ICP, qualification, scoring, company and decision-maker research
Reporting	Lead lists, research briefs, campaign reports and KPI tracking
Workflow	Google Drive, SOPs, documentation, client handoff and portfolio

IMPORTANT

Lead data should be collected from lawful, authorized or publicly available sources and handled according to applicable privacy, platform and anti-spam requirements. Students should never fabricate contact information or present unverified information as fact.

PROJECT PORTFOLIO

01	ICP & Market Research Brief Target customer, segments, research findings and qualification criteria.
02	Company + Decision-Maker Research Structured company and role research with source notes.
03	Lead Database Clean, organized and qualified sample database.
04	AI Lead Research System AI-assisted research, classification, enrichment or qualification.
05	Lead Automation Workflow Input → database → qualification/routing → notification workflow.
06	Sales Research Report Client-ready methodology, lead quality and insights.
07	FINAL CAPSTONE Complete AI-powered lead-generation and sales-research system.

CAREER-READY OUTCOMES

After completing the program, students should be able to:

- Define an Ideal Customer Profile and research criteria.
- Research target companies and decision-maker roles.
- Build clean, structured and qualified lead databases.
- Apply transparent qualification and scoring criteria.
- Use AI to accelerate research while checking accuracy.
- Create prospect-specific research briefs without inventing facts.
- Understand CRM pipelines and organize leads for sales teams.
- Design practical lead-generation and routing automations.
- Prepare professional lead reports and portfolio case studies.
- Deliver a complete lead-generation system for a client or business scenario.

POSSIBLE PROFESSIONAL DIRECTIONS

ROLE	WORK FOCUS
Lead Generation Specialist	Research target companies and build qualified lead lists.
Sales Research Assistant	Provide prospect and market research for sales teams.
B2B Research VA	Handle company, decision-maker and business research.
Lead Generation VA	Build and maintain structured prospect databases.
AI Sales Research Assistant	Use AI for classification, enrichment and research workflows.
Lead Operations Assistant	Support routing, CRM and automated lead workflows.

HOW YOU WILL LEARN

The program emphasizes research quality, business reasoning and repeatable systems.

01	DEFINE Understand the target customer and research objective.
02	RESEARCH Find relevant information from appropriate sources.
03	STRUCTURE Organize information into clean, consistent data.
04	QUALIFY Apply clear criteria and document the reasoning.
05	AUTOMATE Use AI and workflow automation where appropriate.
06	DELIVER Present useful leads, insights and documentation professionally.

FINAL CAPSTONE

Students take a defined business scenario through ICP design → market research → company research → decision-maker research → qualification → lead database → AI assistance → CRM/routing → automation → reporting → professional presentation.
