

AI-POWERED VIRTUAL ASSISTANT & REMOTE OPERATIONS

6-MONTH PROFESSIONAL PROGRAM

Build modern remote business operations with AI, CRM and automation.

VEYORA ACADEMY

Technology • Digital Skills • Professional Learning

PROGRAM AT A GLANCE

A practical six-month pathway for learning how to support businesses remotely using professional VA skills, AI tools, CRM systems and workflow automation.

DURATION	6 Months / 24 Weeks
LEVEL	Beginner → Advanced
FORMAT	Practical + Project-Based
CORE FOCUS	AI-Powered Virtual Assistance
BUSINESS FOCUS	Remote Operations & Support
FINAL OUTPUT	Professional Remote Operations System

WHAT YOU WILL LEARN

- Professional Virtual Assistant fundamentals and remote-work practices.
- Email, calendar, documents, spreadsheets and administrative operations.
- CRM, lead tracking, customer support and business communication.
- AI-assisted research, writing, summarization, data handling and support.
- n8n / Make concepts and practical business workflow automation.
- Client onboarding, task management, reporting and remote collaboration.
- Portfolio building, service packaging and professional client delivery.

YOUR REMOTE OPERATIONS JOURNEY

The program moves from core VA skills into business operations, AI, automation and professional client delivery.

01

VA & Remote Work Foundations

Weeks 1–4

Professional VA role, remote workflow, communication, file systems and productivity.

02

Administrative Operations

Weeks 5–8

Email, calendar, documents, spreadsheets, task management and client operations.

03

CRM, Leads & Customer Support

Weeks 9–12

CRM, lead tracking, sales pipeline, customer support and follow-up systems.

04

AI-Powered VA

Weeks 13–16

AI research, writing, extraction, meeting notes, support and business workflows.

05

Automation & Remote Operations

Weeks 17–20

n8n / Make, forms, Sheets, CRM, onboarding, notifications and AI workflows.

06

Freelance Career & Capstone

Weeks 21–24

Service packages, portfolio, client systems, professional delivery and final project.

24-WEEK PROFESSIONAL CURRICULUM

Every week combines concepts with hands-on implementation. Students should produce a usable output rather than only take notes.

WEEK 1	What Is a Virtual Assistant?
Topics • VA role and responsibilities • Types of VA services • Remote vs on-site workflows • Client expectations	Practical Work Define a VA service profile and target client. Output VA Role & Service Brief
WEEK 2	Remote Work Fundamentals
Topics • Professional online communication • Remote tools and workspaces • Task ownership and deadlines • Digital professionalism	Practical Work Set up a professional remote-work workspace. Output Remote Work Setup
WEEK 3	File & Information Management
Topics • Folders and naming systems • File extensions and formats • Google Drive / cloud organization • Sharing and permissions	Practical Work Create a client-ready digital filing system. Output Client File System

WEEK 4	Productivity & VA Workflow
Topics • Task lists and priorities • Time blocking • Daily/weekly planning • SOP thinking	Practical Work Build a weekly VA workflow and simple SOP. Output VA Productivity System

WEEK 5	Email Management
Topics • Inbox organization • Labels/folders and filters • Professional email handling • Templates and follow-ups	Practical Work Organize a practice client inbox and create response templates. Output Email Management System
WEEK 6	Calendar Management
Topics • Scheduling and availability • Meetings and time zones • Invitations and reminders • Calendar hygiene	Practical Work Manage a simulated client calendar. Output Calendar Operations
WEEK 7	Documents & Business Writing
Topics • Google Docs / Word • Formatting and structure • Reports, proposals and notes • Professional document handling	Practical Work Create a polished client document. Output Business Document Pack
WEEK 8	Spreadsheets for VA Work
Topics • Google Sheets / Excel • Data entry and cleaning • Sorting, filtering and validation • Basic formulas and trackers	Practical Work Build a client task/lead tracker. Output Operations Tracker

WEEK 9	CRM Fundamentals
Topics • What a CRM does • Contacts and companies • Pipeline concepts • CRM data quality	Practical Work Create a sample CRM structure. Output CRM Setup Plan
WEEK 10	Lead Management
Topics • Lead capture • Lead qualification • Lead status • Follow-up tracking	Practical Work Build a lead tracker and qualification process. Output Lead Management System
WEEK 11	Customer Support Operations
Topics • Support channels • Tickets and requests • Response standards • Escalation concepts	Practical Work Create a customer support workflow and FAQ set. Output Support Workflow
WEEK 12	CRM & Support Project
Topics • CRM records • Pipeline • Support workflow • Follow-ups and reporting	Practical Work Combine lead and customer-support processes. Output CRM + Support System

WEEK 13	ChatGPT for VA Work
Topics • Prompt fundamentals • Drafting and rewriting • Summarization • Structured outputs	Practical Work Create reusable prompts for common VA tasks. Output AI Prompt Library
WEEK 14	AI Research & Data Extraction
Topics • Research workflows • Information extraction • Tables and structured data • Fact-checking AI output	Practical Work Turn unstructured information into a clean structured report. Output AI Research Report
WEEK 15	AI Documents, Email & Meetings
Topics • Email assistance • Meeting summaries • Action items • Document drafting	Practical Work Create an AI-assisted meeting-to-action workflow. Output Meeting & Communication System
WEEK 16	AI-Powered VA Project
Topics • AI content workflows • Research • Support assistance • Human review	Practical Work Build a complete AI-assisted VA workflow for a client scenario. Output AI VA System

WEEK 17	Automation Fundamentals
Topics • Triggers and actions • Conditions • Workflow logic • Automation use cases	Practical Work Map one repetitive client task into an automated workflow. Output Automation Blueprint
WEEK 18	n8n / Make Workflows
Topics • Nodes/modules • Data flow • Google Sheets / Forms • Email notifications • Basic webhooks	Practical Work Build a practice form-to-sheet-to-email workflow. Output Business Automation
WEEK 19	CRM & Client Onboarding Automation
Topics • Lead notifications • Client intake • Task creation • Follow-up workflows	Practical Work Design a client onboarding workflow. Output Onboarding Automation
WEEK 20	AI + Automation
Topics • AI inside workflows • Classification • Summarization • Routing • Human approval	Practical Work Build an AI-assisted operational workflow. Output AI Operations Automation

WEEK 21	Remote Team & Project Operations
Topics • Task/project management • Team communication • Status reporting • Meeting coordination	Practical Work Create a lightweight remote team operations system. Output Remote Operations Board
WEEK 22	Freelance VA Services & Portfolio
Topics • Service packages • Portfolio projects • Profile positioning • Professional proposals • Client requirements	Practical Work Create a VA service menu and portfolio structure. Output VA Portfolio
WEEK 23	Client Onboarding & Delivery System
Topics • Discovery • Scope and deliverables • Onboarding checklist • Reporting • Retainer workflow	Practical Work Create a complete client delivery system. Output Client Delivery Kit
WEEK 24	Final Capstone & Presentation
Topics • Business scenario • VA operations • CRM/support • AI • Automation • Reporting	Practical Work Present a complete remote operations system for a fictional or authorized client. Output Final Capstone

TOOLS & PROFESSIONAL STACK

The goal is to learn how tools work together in a remote business environment.

AREA	TOOLS / SKILLS
Workspace	Google Drive, Google Docs, Google Sheets, Google Calendar, Gmail
Productivity	Task management, calendars, SOPs, checklists, reporting
Office	Microsoft Word, Excel, PowerPoint
CRM	CRM concepts, contacts, pipeline, lead stages, customer records
Support	Ticketing concepts, FAQ systems, customer communication
AI	ChatGPT and AI-assisted research, writing, extraction and summarization
Automation	n8n, Make, triggers, actions, conditions, webhooks
Communication	Professional email, meetings, client updates, documentation
Portfolio	Google Drive, portfolio documents, screenshots, case studies

Important

Tool availability, pricing, interfaces and integrations can change. Students should verify current provider requirements before using a tool for a real client. Practice with authorized accounts and test data.

PROJECT PORTFOLIO

Students should finish with evidence of practical work they can demonstrate to clients or use in a professional portfolio.

01	Professional VA Workspace Organized cloud drive, communication system, calendar and task workflow.
02	Client Operations Tracker Spreadsheet-based tracker for tasks, leads, status and follow-ups.
03	CRM + Support System Lead pipeline, customer records, support workflow and reporting.
04	AI-Powered VA System AI-assisted research, email, meeting notes and structured business output.
05	Business Automation Workflow Automated form → data → notification / CRM-style workflow.
06	Client Delivery Kit Service package, onboarding checklist, reporting format and communication templates.
07	FINAL CAPSTONE Complete remote operations system combining VA, CRM, AI and automation.

CAREER-READY OUTCOMES

After completing the program, students should be able to:

- Set up and maintain a professional remote-work environment.
- Manage business email, calendars, documents and routine administrative operations.
- Create organized trackers, reports and client documentation.
- Maintain CRM records, manage leads and track follow-ups.
- Support customer requests using structured workflows.
- Use AI to accelerate research, writing, summarization, extraction and administrative tasks.
- Design practical automations for repetitive business processes.
- Create client onboarding, delivery and reporting systems.
- Build a professional VA portfolio and service offering.
- Explain and demonstrate a complete AI-powered remote operations workflow.

POSSIBLE PROFESSIONAL DIRECTIONS

ROLE	WORK FOCUS
AI-Powered Virtual Assistant	Administrative, research and AI-assisted business support.
Remote Operations Assistant	Daily operations, documentation, task coordination and reporting.
CRM / Sales Support Assistant	Lead management, CRM updates and follow-up operations.
Customer Support VA	Customer communication, FAQs, tickets and support workflows.
Executive / Administrative VA	Calendar, email, documents, meetings and executive support.
Automation VA	AI tools, n8n/Make workflows and repetitive-task automation.

HOW YOU WILL LEARN

Veyora Academy uses a practical learning model designed to turn individual tools into complete business workflows.

01	LEARN Understand the concept and why it matters.
02	WATCH See the workflow demonstrated.
03	BUILD Complete the task with guidance.
04	PRACTICE Repeat the skill independently.
05	REVIEW Correct errors and improve the output.
06	SYSTEMIZE Turn the skill into a repeatable process or SOP.

FINAL CAPSTONE

Students will take a fictional or authorized client scenario and build a complete remote operations system: client requirements → files → email/calendar → task management → CRM → customer support → AI assistance → automation → reporting → professional presentation.
