

VEYORA ACADEMY

DATA ANALYTICS & BUSINESS INTELLIGENCE

6-MONTH PROGRAM

Beginner → Intermediate → Advanced

Excel • SQL • Power BI • Python

Professional learning • Practical projects • Portfolio-ready outcomes

PROGRAM AT A GLANCE

From raw data to business decisions.

A structured 24-week pathway for students who want practical analytics and Business Intelligence skills—not just software tutorials.

06 MONTHS Structured learning journey	24 WEEKS Hands-on curriculum	05 PROJECTS Portfolio-focused builds	05+ CORE TOOLS Excel, SQL, BI, Python & more
--	---	---	---

WHAT STUDENTS WILL BE ABLE TO DO

Core outcomes

	✓ Analyze data using Excel and SQL.	✓ Build interactive Power BI dashboards.	✓ Use Pow
lations.	✓ Work with KPIs, trends, patterns and outliers.	✓ Use Python for analytics and visualization.	✓ Commun

01

EXCEL FOR DATA ANALYTICS

Weeks 1–4

WEEK 1

- Data types and spreadsheet structure
- Sorting and filtering
- Relative and absolute references
- Basic formulas and data cleaning
- Practical sales dataset

WEEK 2

- SUM, AVERAGE, COUNT, COUNTA
- IF, AND, OR
- SUMIF, SUMIFS
- COUNTIF, COUNTIFS
- XLOOKUP, INDEX/MATCH
- Text and date functions

WEEK 3

- Pivot Tables
- Pivot Charts
- Slicers
- Grouping and calculated fields
- KPI summaries
- Interactive reporting

WEEK 4

- PROJECT: Business Sales Analytics Dashboard
- Clean raw data
- Analyze performance
- Create KPIs and dashboard
- Present findings

WEEK 5

- Database concepts
- Tables, rows and columns
- SELECT
- WHERE
- ORDER BY
- DISTINCT and LIMIT

WEEK 6

- COUNT, SUM, AVG, MIN, MAX
- GROUP BY
- HAVING
- CASE
- NULL values

WEEK 7

- INNER JOIN
- LEFT JOIN
- Multi-table analysis
- Subqueries
- CTE basics

WEEK 8

- PROJECT: Online Store / E-Commerce Analysis
- Customer analysis
- Product performance
- Sales trends
- Revenue questions
- Business insights

03

POWER BI & POWER QUERY

Weeks 9–12

WEEK 9

- Power BI interface
- Data sources
- Importing datasets
- Tables and relationships
- Reports and dashboards
- Visual selection

WEEK 10

- Data cleaning
- Duplicate removal
- Missing values
- Data types
- Split and merge columns
- Merge / Append Queries
- Pivot / Unpivot

WEEK 11

- Fact and dimension concepts
- Relationships
- Cardinality
- Star schema
- Data table fundamentals

WEEK 12

- Measures vs calculated columns
- SUM
- COUNT
- CALCULATE
- FILTER
- DIVIDE
- Time-intelligence concepts

04

ADVANCED POWER BI

Weeks 13–16

WEEK 13

- KPI cards
- Charts and tables
- Slicers and filters
- Drill-down
- Drill-through
- Tooltips
- Interactive navigation

WEEK 14

- Business questions
- Trends
- Patterns
- Outliers
- Meaningful visual selection
- Actionable insights

WEEK 15

- Advanced DAX concepts
- Time intelligence
- Dynamic measures
- Conditional formatting
- Bookmarks and navigation
- Mobile layouts
- Performance
- AI/Copilot features where available

WEEK 16

- PROJECT: Hospital / Business Performance Dashboard
- Data preparation
- Data modeling
- DAX measures
- Interactive dashboard
- Executive-style insights

WEEK 17

- Revenue
- Profit
- Growth
- Conversion
- Retention
- Customer acquisition cost
- Operational and financial KPIs

WEEK 18

- What changed?
- Why did it change?
- Which segment is performing?
- Where are losses or bottlenecks?
- What should management investigate next?

WEEK 19

- Executive dashboards
- Stakeholder requirements
- Reporting structure
- Business communication
- Data storytelling
- Decision-focused recommendations

WEEK 20

- BI CASE STUDY
- Business Problem → KPIs → Data → Analysis → Dashboard → Findings → Recommendations

WEEK 21

- Python basics for analysts
- Jupyter Notebook
- Pandas
- NumPy fundamentals
- CSV and Excel files
- Data cleaning
- Basic analysis
- Matplotlib

WEEK 22

- PROJECT: Real Dataset Analysis
- Load data
- Clean data
- Explore patterns
- Calculate metrics
- Create visualizations
- Write findings

WEEK 23

- GitHub portfolio
- Project documentation
- Resume project descriptions
- Project presentation
- Interview preparation
- Professional reporting

WEEK 24

- FINAL CAPSTONE
- Raw data → cleaning → SQL / Excel → Power Query → data model → DAX → Power BI → insights → recommendations

Build evidence of skill—not just certificates.

Students complete a sequence of projects that grows from spreadsheet analysis to an end-to-end Business Intelligence capstone.

01	BUSINESS SALES ANALYTICS Excel	Clean data • KPIs • Pivot reporting • Dashboard
02	E-COMMERCE ANALYSIS SQL	Queries • joins • customer/product insights
03	PERFORMANCE DASHBOARD Power BI	Power Query • modeling • DAX • interactive visuals
04	REAL DATASET ANALYSIS Python	Pandas • NumPy • visualization • findings
05	FINAL BI CAPSTONE End-to-End	Raw data → analysis → dashboard → recommendations

TOOLS & TECHNOLOGIES

The analytics toolkit

Excel	SQL	Power BI	Power Query
DAX	Python	Pandas	NumPy
Matplotlib	Jupyter	VS Code	Google Sheets
GitHub			

LEARNING SYSTEM

Learn → Practice → Build → Present

Each major topic is taught through a repeatable practical cycle.

01	CONCEPT Understand the purpose, terminology and business use.
02	DEMO Watch the complete workflow being built step by step.
03	PRACTICE Work hands-on with realistic datasets and scenarios.
04	PROJECT Apply the skill to a business problem.
05	PRESENT Explain the analysis, findings and recommendations.

ASSESSMENT

How progress is measured

20% Theory & Concepts	40% Practical Work	20% Assignments	20% Projects
---------------------------------	------------------------------	---------------------------	------------------------

What students leave with

The program is designed to move students beyond software tutorials and toward practical business analysis.

EXCEL Data cleaning, formulas, Pivot Tables and dashboards.	SQL Queries, joins, aggregation and business analysis.
POWER BI Power Query, data modeling, DAX and interactive dashboards.	PYTHON Pandas, NumPy, analysis and visualization.
BUSINESS INTELLIGENCE KPIs, storytelling, stakeholder reporting and recommendations.	PORTFOLIO Multiple practical projects plus a final end-to-end capstone.

VEYORA ACADEMY

A Division of VEYORA

Veyora Academy is the education and professional training division of Veyora, focused on practical technology, digital systems, AI, data and career-ready skills.

Registered Business • NTN / FBR Registered

Professional Learning. Practical Skills. Real Projects.
