

EC

E-COMMERCE & SHOPIFY DEVELOPMENT

6-MONTH PROFESSIONAL PROGRAM

From store setup to a complete e-commerce business system.

VEYORA ACADEMY

Technology • Digital Skills • Professional Learning

PROGRAM AT A GLANCE

A practical 6-month pathway for learning how to build, manage, launch and improve modern e-commerce stores using Shopify and supporting digital tools.

DURATION	6 Months / 24 Weeks
LEVEL	Beginner → Advanced
FORMAT	Practical + Project-Based
CORE PLATFORM	Shopify
BUSINESS FOCUS	E-commerce Store Development
FINAL OUTPUT	Launch-Ready E-commerce Capstone

WHAT YOU WILL LEARN

- Build professional Shopify stores from the ground up.
- Understand products, collections, inventory, pricing and store structure.
- Customize themes and create a polished customer experience.
- Configure payments, shipping, taxes and essential store settings.
- Use Shopify apps and integrations to extend store functionality.
- Apply e-commerce analytics, conversion thinking and customer journey principles.
- Use AI tools for product content, customer support, research and marketing workflows.
- Create a portfolio-ready e-commerce project and understand the launch process.

YOUR E-COMMERCE JOURNEY

The program moves from fundamentals to store building, operations, growth and a final business-ready project.

01

E-Commerce Foundations

Weeks 1–4

Business model, Shopify setup, store architecture, products and collections.

02

Store Design & Theme Development

Weeks 5–8

Theme customization, navigation, pages, responsive design and customer experience.

03

Store Operations

Weeks 9–12

Payments, shipping, taxes, inventory, orders, discounts and apps.

04

Marketing & Conversion

Weeks 13–16

Product pages, SEO, conversion principles, email, social and campaign basics.

05

Analytics & Automation

Weeks 17–20

Shopify analytics, KPIs, customer data, AI tools and workflow automation.

06

Launch & Capstone

Weeks 21–24

Testing, optimization, launch planning, documentation and final e-commerce store.

24-WEEK PROFESSIONAL CURRICULUM

Each week combines concepts with hands-on implementation. The goal is not only to understand Shopify, but to produce real e-commerce work.

WEEK 1	E-Commerce Fundamentals
Topics • What e-commerce is and how online stores work • B2C, D2C, marketplace and service models • Customer journey and basic store structure	Practical Work Define a store idea, target customer and product category. Output E-commerce business idea brief
WEEK 2	Shopify Fundamentals
Topics • Shopify ecosystem and admin dashboard • Store settings, domains and basic configuration • Products, navigation and core pages	Practical Work Create a practice Shopify store and configure its basic structure. Output Shopify store setup
WEEK 3	Products & Collections
Topics • Product titles, descriptions and media • Variants, pricing, inventory and SKUs • Collections, tags and product organization	Practical Work Build a structured product catalog using sample products. Output Product catalog

WEEK 4	Store Architecture
Topics • Navigation and menus • Home, collection, product, cart and policy pages • Trust elements and customer journey	Practical Work Design the information architecture before visual customization. Output Store architecture map

WEEK 5	Themes & Visual Design
Topics • Shopify themes • Brand identity, typography and layout • Sections, blocks and theme settings	Practical Work Customize a theme to match a defined brand identity. Output Branded storefront
WEEK 6	Responsive Store Design
Topics • Mobile-first thinking • Responsive layouts • Images, spacing and usability	Practical Work Test the storefront across desktop and mobile views. Output Responsive storefront
WEEK 7	Pages & Customer Experience
Topics • About, Contact, FAQ and policy pages • Trust signals and social proof • UX consistency	Practical Work Create a complete set of customer-facing pages. Output Complete page system
WEEK 8	Store Design Project
Topics • Homepage composition • Navigation refinement • Product-page presentation • Design QA	Practical Work Complete a polished storefront using the skills from Weeks 5–7. Output Mini Shopify Store Project

WEEK 9	Payments & Checkout
Topics • Payment concepts • Checkout settings • Order workflow • Customer notifications	Practical Work Configure a safe practice checkout environment and understand payment flow. Output Checkout configuration
WEEK 10	Shipping & Taxes
Topics • Shipping zones and rates • Local vs international shipping • Tax concepts and settings	Practical Work Design a shipping policy and configure practice shipping rules. Output Shipping setup
WEEK 11	Inventory & Orders
Topics • Inventory tracking • Order lifecycle • Fulfillment concepts • Returns and refunds	Practical Work Simulate orders and manage their lifecycle in a practice environment. Output Order management exercise
WEEK 12	Shopify Apps & Integrations
Topics • App ecosystem • Reviews, forms, email and support apps • Evaluating app quality, permissions and cost	Practical Work Select suitable apps for a store and document why each is needed. Output App integration plan

WEEK 13	Product Page Optimization
Topics • Strong product titles and descriptions • Benefits vs features • Images, FAQs, trust and calls to action	Practical Work Improve a weak product page using a conversion-focused checklist. Output Optimized product page
WEEK 14	E-Commerce SEO
Topics • Search intent • Product and collection SEO • Meta titles and descriptions • Image alt text and site structure	Practical Work Optimize sample store pages for search visibility. Output SEO optimization task
WEEK 15	Marketing Foundations
Topics • Organic social content • Email marketing basics • Promotions and discount strategy • Customer retention concepts	Practical Work Create a basic 2-week marketing plan for the store. Output Marketing plan
WEEK 16	Conversion & Customer Journey
Topics • Conversion principles • Cart and checkout friction • Abandoned-cart concepts • A/B testing mindset	Practical Work Audit a storefront and identify practical improvement opportunities. Output Conversion audit

WEEK 17	Analytics & KPIs
Topics • Sales, orders and average order value • Conversion rate • Traffic and acquisition concepts • Customer behavior	Practical Work Build a KPI sheet for a sample e-commerce business. Output E-commerce KPI tracker
WEEK 18	AI for E-Commerce
Topics • AI product descriptions • Customer support assistance • Product research and content ideas • Prompting for business tasks	Practical Work Use AI to create and refine store content while reviewing outputs for accuracy. Output AI-assisted store content
WEEK 19	Automation & Workflows
Topics • Triggers, actions and conditions • Shopify + automation concepts • Lead/customer notifications • Order and support workflows	Practical Work Design an automation workflow for a store process. Output E-commerce automation map
WEEK 20	Customer Support & Retention

Topics

- FAQ systems
- Support workflows
- Customer segmentation concepts
- Repeat-purchase thinking

Practical Work

Create a customer-support workflow and retention plan.

Output

Support + retention system

WEEK 21	Store Testing & Quality Assurance
Topics • Broken links and navigation • Mobile testing • Product/cart/c checkout checks • Policy and trust review	Practical Work Run a complete pre-launch QA checklist. Output Store QA report
WEEK 22	Launch Strategy
Topics • Domain and launch preparation • Store readiness checklist • Marketing launch plan • Basic post-launch monitoring	Practical Work Prepare a launch checklist and first-week action plan. Output Launch plan
WEEK 23	Capstone Build
Topics • Store build completion • Products and collections • Theme customization • Apps, policies and operations • Analytics and optimization	Practical Work Build the final store from a business brief through implementation. Output Final E-Commerce Store
WEEK 24	Capstone Presentation & Portfolio

Topics

- Store walkthrough
- Business model and target customer
- Technical setup
- Marketing and analytics plan
- Portfolio documentation

Practical Work

Present the final store and document the work professionally.

Output

Final Capstone Presentation

TOOLS & TECHNOLOGY STACK

You will work with a practical e-commerce toolkit rather than learning Shopify in isolation.

AREA	TOOLS / SKILLS
Core Platform	Shopify
Storefront	Shopify Themes, Liquid concepts, HTML, CSS
Business	Products, Collections, Inventory, Orders, Discounts
Payments & Operations	Payment gateways, Shipping, Taxes, Checkout
Marketing	SEO, Email, Social Media, Campaign Planning
Analytics	Shopify Analytics, KPIs, Reporting
AI	ChatGPT and AI-assisted content/research workflows
Automation	n8n / Make concepts, webhooks and workflow automation
Creative	Canva and image/content creation tools
Professional Workflow	Google Sheets, Google Drive, Git/GitHub concepts

IMPORTANT

Payment gateways, taxes, shipping providers, apps and other services can vary by country, business type and provider. Students should use authorized test environments and verify current provider requirements before launch.

PROJECT PORTFOLIO

By the end of the program, students should have practical work that can be demonstrated to clients or used as a professional portfolio.

01

Store Strategy Brief

Business idea, customer profile, product category, positioning and store architecture.

02

Branded Shopify Store

Customized storefront with navigation, products, collections and core pages.

03

E-Commerce Operations Setup

Practice configuration for inventory, orders, shipping, checkout and store policies.

04

Conversion & SEO Audit

Structured audit of product pages, customer journey, SEO and conversion opportunities.

05

AI + Automation Workflow

AI-assisted store content plus an automation concept for leads, support or operations.

06

FINAL CAPSTONE

A complete e-commerce store with documentation, launch plan, KPIs and presentation.

CAREER-READY OUTCOMES

After completing the program, students should be able to:

- Plan and structure an e-commerce store around a real business idea.
- Create and customize a Shopify storefront with a consistent brand experience.
- Organize products, collections, variants, inventory and store content.
- Understand checkout, payment, shipping, tax and order-management workflows.
- Use apps and integrations thoughtfully instead of installing tools without a business reason.
- Create stronger product pages and apply basic SEO and conversion principles.
- Read core e-commerce KPIs and use data to identify improvement opportunities.
- Use AI and automation to reduce repetitive content and operational work.
- Prepare a store for testing, launch and ongoing optimization.
- Present a complete e-commerce project as part of a professional portfolio.

POSSIBLE PROFESSIONAL DIRECTIONS

ROLE	WORK FOCUS
Shopify Store Developer	Build and customize Shopify stores for businesses.
E-Commerce Assistant	Support product, order, content and store operations.
E-Commerce Manager	Coordinate store operations, campaigns and performance.
Shopify Virtual Assistant	Handle catalog, customer, research and operational tasks.
E-Commerce Specialist	Work across store setup, optimization and growth activities.
Freelance Shopify Specialist	Offer store setup, customization, optimization or maintenance services.

HOW YOU WILL LEARN

Veyora Academy uses a practical learning model designed to turn lessons into usable skills.

01	LEARN Understand the concept and why it matters.
02	WATCH See the instructor demonstrate the process.
03	BUILD Complete the task hands-on with guidance.
04	PRACTICE Repeat the skill independently.
05	REVIEW Receive feedback and correct mistakes.
06	CREATE Apply the skill inside a real project.

FINAL CAPSTONE

Students will take a defined business idea through store strategy, product setup, design, operations, optimization, analytics and launch preparation, then present the finished e-commerce system professionally.
