

VEYORA ACADEMY

Graphic Design & AI Creative Design

Beginner → Professional Designer → AI Creative

A 6-month practical program for visual design, branding, social media design, layouts, typography, image editing, portfolio development and responsible AI-assisted creative workflows.

24 WEEKS • 6 PHASES • PORTFOLIO + CREATIVE CAPSTONE

COURSE PALETTE

Creative Violet #6C1F83	Electric Purple #A16AE8	Studio Coral #FFA59C	Warm Cream #FFF3D9
----------------------------	----------------------------	-------------------------	-----------------------

Learn to Think Like a Designer

Graphic design is more than making something look attractive. This program teaches students to solve visual communication problems with composition, hierarchy, typography, color, imagery and brand consistency.

WHO THIS IS FOR

Beginners, students, aspiring graphic designers, freelancers, and professionals looking to sharpen their professional visual-design skills.

WHAT YOU BUILD

Brand identity pieces, social posts, posters, thumbnails, presentations, marketing assets and a professional portfolio.

CORE OUTCOME

Understand the brief → identify the audience → choose a visual style → create a design

LEARNING STYLE

Every phase produces portfolio evidence. Students learn principles first, then apply them to real-world projects.

DESIGN METHOD

Brief → Research → Concept → Compose → Refine → Deliver

Your Creative Design Roadmap

PHASE 1 Weeks 1-4	Design Foundations	Design principles, visual hierarchy, composition, color, typography, grids, spacing and creative process.
PHASE 2 Weeks 5-8	Tools & Visual Production	Canva, Photoshop-style editing, Illustrator/vector concepts, image editing, layouts and production workflow.
PHASE 3 Weeks 9-12	Branding & Visual Identity	Brand strategy, moodboards, logos, typography systems, color palettes, brand assets and mini identity systems.
PHASE 4 Weeks 13-16	Social, Marketing & Content Design	Social media graphics, carousels, ads, posters, thumbnails, campaign systems and content consistency.
PHASE 5 Weeks 17-20	AI Creative Design	AI image generation, ideation, variations, image editing, creative direction, prompt thinking and human refinement.
PHASE 6 Weeks 21-24	Professional Portfolio & Capstone	Client briefs, portfolio case studies, design presentation, revisions, delivery standards and final creative system.

CAPSTONE THREAD

Students should build a consistent portfolio throughout the course. Each phase adds a new category of design evidence until the final capstone becomes a complete visual identity + campaign system.

Six Months of Practical Design Training

Students learn the principle, practice the skill, produce an asset, receive feedback and refine it.

WEEK 01	What Is Graphic Design? Design vs decoration, visual communication, audience, brief, designer role and creative process. Student Output: Design analysis exercise + creative brief
WEEK 02	Composition & Visual Hierarchy Alignment, balance, contrast, proximity, repetition, focal point, scale and whitespace. Student Output: Poster composition study
WEEK 03	Color Theory Color wheel, hue, value, saturation, harmony, contrast, palettes and color meaning. Student Output: Three color palettes + applications
WEEK 04	Typography & Layout Type anatomy, pairing, hierarchy, readability, grids, spacing and responsive layout thinking. Student Output: Typography + editorial layout project

Practical Curriculum

WEEK 05	Design Tools Workflow Canva, Photoshop-style workflow, vector concepts, layers, masks, selections, export settings. Student Output: Tool practice board
WEEK 06	Image Editing & Retouching Cropping, masking, background removal, corrections, compositing, light/color adjustments. Student Output: Before/after image-editing project
WEEK 07	Vector & Shape Design Vector thinking, paths, shapes, icons, simple illustrations and scalable artwork. Student Output: Vector/icon set
WEEK 08	Production & File Standards Canvas sizes, RGB/CMYK concepts, resolution, exports, naming, versions and delivery formats. Student Output: Production-ready design package

Practical Curriculum

WEEK 09	Brand Strategy Audience, positioning, brand personality, competitors, visual direction and creative brief. Student Output: Brand discovery brief
WEEK 10	Moodboards & Creative Direction References, visual themes, image direction, typography direction, palette direction. Student Output: Moodboard + creative direction board
WEEK 11	Logo & Identity Concepts Logo types, symbols, wordmarks, construction, spacing, concept presentation and refinement. Student Output: Logo concept set
WEEK 12	Mini Brand Identity Logo system, palette, typography, social avatar, business card/stationery and brand rules. Student Output: Mini brand identity system

Practical Curriculum

WEEK 13	Social Media Design Platform formats, hierarchy, hooks, grids, content systems, carousels and consistency. Student Output: Social media design set
WEEK 14	Marketing & Ad Creative Offer hierarchy, CTA, visual persuasion, ad layouts, promotional graphics and variations. Student Output: Ad creative campaign
WEEK 15	Posters, Flyers & Print Design Information hierarchy, print layout, bleed concepts, readability and visual impact. Student Output: Poster/flyer project
WEEK 16	Thumbnails & Campaign Systems YouTube-style thumbnails, campaign consistency, visual testing and variations. Student Output: Thumbnail + campaign system

Practical Curriculum

WEEK 17	AI for Creative Ideation AI-assisted concepts, mood exploration, visual references, prompt structure and creative direction. Student Output: AI concept board
WEEK 18	AI Image Generation & Editing Generate variations, composition control, editing, background/asset creation and refinement. Student Output: AI-assisted visual asset set
WEEK 19	AI + Brand Content Use AI to create campaign directions, copy/visual combinations, layouts and creative variants. Student Output: AI-assisted campaign kit
WEEK 20	Responsible AI Creative Workflow Copyright awareness, authenticity, disclosure where appropriate, human review, consistency and quality control. Student Output: AI creative workflow + QA checklist

Practical Curriculum

WEEK 21	Client Briefs & Revisions Reading briefs, asking questions, feedback, revision rounds, version control and client presentation. Student Output: Client simulation project
WEEK 22	Portfolio Building Portfolio structure, case studies, process presentation, mockups, project descriptions and curation. Student Output: Portfolio draft
WEEK 23	Freelance Design Services Service packages, proposal samples, design delivery, pricing concepts, scope and professional communication. Student Output: Design service menu + proposal
WEEK 24	Final Creative Capstone Complete identity/campaign system, present rationale, show process, receive critique and finalize portfolio. Student Output: Graphic Design + AI Creative Capstone

Tools You Will Learn to Work With

Tool names may change or add features over time. The transferable skill is visual problem-solving and production discipline.

Design & Layout	Canva, Adobe-style layout tools	Social posts, presentations, posters, marketing layouts and templates
Image Editing	Photoshop-style editing, Canva editing tools	Retouching, masking, compositing, background removal and corrections
Vector Design	Illustrator-style vector tools	Logos, icons, shapes, scalable graphics and simple illustrations
Typography	Font libraries + design software	Type pairing, hierarchy, readability and brand systems
AI Creative	ChatGPT, image-generation/editing AI tools	Ideation, creative direction, visual variations and production assistance
Branding	Moodboard, palette and identity tools	Brand direction, logo systems, color, typography and guidelines
Portfolio	Behance-style portfolios, PDF portfolio, website	Presenting work, process, case studies and professional proof
File Production	Cloud storage, image/PDF export tools	Versions, naming, formats, delivery and organization

TOOL PRINCIPLE

Do not let the software become the student's identity. A strong designer can transfer design principles across tools and can explain the visual reasoning behind the work.

Build a Designer's Body of Work

01 • Design Foundations Collection

Poster study, typography layout, color palette exploration and composition exercise.

02 • Image Editing Project

Before/after retouching, compositing or background transformation with a professional presentation.

03 • Mini Brand Identity

Logo concepts, palette, typography, social avatar and mini brand guide.

04 • Social Media Campaign

A consistent set of posts/carousels with visual hierarchy and campaign direction.

05 • Marketing Creative Pack

Ad creatives, promotional graphic, poster/flyer and multiple visual variations.

06 • AI Creative Campaign

AI-assisted concepts, visual assets, human refinement, consistency and QA.

07 • Final Creative Capstone

A complete brand/campaign system presented as a professional case study.

PORTFOLIO STANDARD

Every major project should show brief → research → concept → process → final design → rationale. Students should explain not only what they made, but why the design decisions communicate the intended message.

What You Can Work Toward

Graphic Designer	Brand graphics, social media, marketing materials, layouts and visual assets
Social Media Designer	Posts, carousels, campaign graphics, thumbnails and content systems
Brand Identity Designer	Logos, palettes, typography systems, brand assets and guidelines
AI Creative Designer	AI-assisted visual concepts, image generation, editing and campaign assets
Marketing / Ad Creative Designer	Promotional graphics, ad variations, campaign systems and visual testing
Thumbnail / Content Designer	Attention-focused thumbnails, content graphics and creator assets
Freelance Graphic Designer	Client briefs, design systems, revisions, delivery and portfolio services

DESIGNER PRINCIPLE

Good design makes the intended message easier to see, understand and remember. Beauty matters—but clarity, audience, purpose and consistency matter too.

The Veyora Creative Method

BRIEF

Understand the audience, objective, deliverables and constraints.

RESEARCH

Study references, competitors, visual language and audience expectations.

CONCEPT

Generate multiple directions before committing to one.

COMPOSE

Apply hierarchy, typography, color, imagery, grids and spacing.

REFINE

Review alignment, contrast, consistency, readability and technical quality.

DELIVER

Export correctly, organize files, present rationale and respond to feedback.

PROFESSIONAL & ETHICAL PRACTICE

- Do not present another designer's work as your own.
- Respect copyright, licensing, trademarks, stock-asset terms and client ownership agreements.
- Clearly distinguish student/practice work from paid client work.
- AI-generated or AI-assisted work should be reviewed, refined and used in accordance with the relevant tool's terms and the client's requirements.
- Avoid unnecessary personal/confidential client information in AI tools.
- Do not fabricate campaign results, client testimonials or performance metrics.
- Keep source files and final exports organized for professional handoff.

Build a Complete Brand + Campaign System

Students should demonstrate both traditional design fundamentals and responsible AI-assisted creative production.

01	Creative Brief Define brand/project goal, audience, message, deliverables and constraints.
02	Research & Moodboard Build references and explain the visual direction.
03	Visual Identity Create logo/mark concept, palette, typography and supporting visual language.
04	Campaign System Develop social/marketing assets that feel like one coherent campaign.
05	AI Creative Layer Use AI for ideation or asset creation where appropriate, then refine the work manually.
06	Production Prepare correct sizes, formats, naming, versions and source/final files.
07	Client Presentation Present the work, explain decisions and respond to structured feedback.
08	Case Study Document brief, process, rationale, final outputs and lessons learned.
09	Portfolio Presentation Curate the strongest work and present it as a professional designer portfolio.

FINAL PRESENTATION

Students should be able to explain: Who is the audience? What is the message? Why this visual direction? How do typography, color and composition support it? What did AI assist with? What did the designer refine? How is the final work delivered?

Before You Call Yourself Portfolio-Ready

☐ Design principles exercise	☐ Typography project
☐ Color palette system	☐ Image-editing project
☐ Vector/icon work	☐ Production/file-standard package
☐ Brand discovery brief	☐ Moodboard + creative direction
☐ Logo concept set	☐ Mini brand identity
☐ Social media campaign	☐ Marketing/ad creative pack
☐ Poster/flyer project	☐ AI creative asset set
☐ AI workflow + QA checklist	☐ Client simulation + revision
☐ Professional portfolio	☐ Final creative capstone

VEYORA ACADEMY

Students who successfully complete the required learning activities, practical work and final assessment may receive a Veyora Academy course certificate according to the academy's certification policy.

FROM IDEA TO VISUAL IMPACT

The goal is not simply to learn design software. The goal is to develop visual judgment, creative problem-solving, production discipline and a portfolio that demonstrates what you can create.

VEYORA ACADEMY • PRACTICAL SKILLS • CREATIVE SYSTEMS • AI-ASSISTED DESIGN
